

Status Level	Movement Requirement - Breeding Animals	Movement Requirement - Steers & Spayed Heifers	Prevalence Level (risk)	Qualification for Advancement to the Next Level
Accredited Free	No test requirement out of State or zone	No test requirement out of State or zone	0% herd prevalence, or one infected herd during the previous 12 months, and meets the minimum standards set by the program UMR. If two infected herds are disclosed in an Accredited Free State/zone within a 48 month consecutive period, the State status would decrease.	If one infected herd is detected in a State/zone considered to be Accredited Free, the herd must be depopulated, and a complete epidemiologic investigation of the outbreak must be completed within 6 months from detection of the infected herd or face status reduction.
Modified Accredited Advanced (NEW STATUS)	One Negative TB test required prior to interstate/interzone movement.	No test requirement out of State or zone	< 0.01 % herd prevalence or 1-3 infected herds in States/zones with fewer than 30,000 herds, and meets the minimum standards set by the program UMR.	Must follow the UMR and must not have an infected herd for previous 5 years. If a State/zone has depopulated all affected herds, then the State/zone would qualify for Free Status in 3 years.
Modified Accredited	Herd of origin TB test requirement and 1 individual animal TB tests required prior to interstate/interzone movement. Cervidae from Qualified & Monitored herds would require only 1 negative test. Cattle or cervids from Accredited herds may move if Accreditation test was within 12-months of movement.	One individual animal TB test required prior to interstate/interzone movement.	< 0.1 % herd prevalence, or a maximum of 5-10 infected herds or a maximum of 10 infected herds in States/zones with fewer than 10,000 herds, and meets the minimum standards set by the program UMR for the past year.	Must follow UMR and verify a herd prevalence of less than 0.01% or less than 1-3 infected herds in States/zones with fewer than 30,000 herds for 2 consecutive years.
Accreditation Preparatory (NEW STATUS)	Herd of origin TB test requirement and 2 individual animal TB tests required prior to interstate movement. Cervidae from Qualified & Monitored herds would require only 1 negative test. Cattle or Cervids from Accredited herds would require 1 negative test.	Herd of origin TB test requirement and 1 individual animal TB tests required prior to interstate/interzone movement. Cervidae from Qualified & Monitored herds would require only 1 negative test. Cattle or cervids from Accredited herds may move if Accreditation test was within 12-months of movement.	< 0.5 % herd prevalence, and meets the minimum standards set by the program UMR.	Must follow UMR and verify a herd prevalence of less than 0.1% or less than 10 infected herds in States/zones with fewer than 10,000 herds, for 1 year.
Non Accredited	PROHIBITED	PROHIBITED	Unknown or greater than or equal to 0.5%, or doesn't meet minimum standards set by the program UMR.	Must have authority to enforce UMR, maintain a herd census, establish a surveillance system, and have determined a herd prevalence rate of <0.5 %.
